# ARDEX Bituminous Roof Sealant

## One-Component, Bitumen-Based Sealant

### DESCRIPTION

ARDEX Bituminous Roof Sealant is a one-component, easy-to-use, UV-stable sealant with bitumen-based solvents. It is used for gluing and sealing on roofs. It is ideal for fast repairs of cracks, holes and fractures on roofs and between old bitumen membranes and can be applied over a multitude of surfaces including tin, aluminum, copper, brass, ceramic, bitumen, concrete, plasters, roof tiles and plaster tiles without the use of a primer.

### SUBSTRATE PREPARATION

The surface being adhered to must be clean, firm and free of dust, dirt, oil, grease, and other barrier materials. If there are any signs of contamination visible on the old membrane, they have to be thoroughly removed and the sealant has to be applied onto a sound surface. Alcohol and nitro-cleaners can be used for cleaning.

### INSTRUCTIONS

The sealant can be applied with a standard caulking gun. Alcohol and nitro-cleaners can be used for cleaning.

NOTE: Not suitable for gluing polyurethane and polystyrene.

### SKIN FORMATION TIME

5 – 15 minutes depending on ambient and substrate temperature.

### PACKAGING

ARDEX Bituminous Roof Sealant is in a 300ml cartridge.

### SHELF LIFE

12 months when stored in the original unopened packaging, in a dry place at 23°C and 50% relative humidity.
